INSTALLATION INSTRUCTIONS:

Determine location to mount your Luminator LED Mini Light Bar. Do not install this product or route any wires in the deployment area of your air bag. Equipment mounted or located in the air bag deployment area will damage or reduce the effectiveness of the air bag, or become a projectile that could cause serious personal injury or death.

WARNING: The steel content of vehicle roofs varies considerably and some may not be suitable for mounting warning lights with magnetic bases. **It is the sole responsibility of the users** of magnetic based lights to determine if portable warning lights may be safely used on the exterior of vehicle.

If mounting this product requires drilling holes, the installer **MUST** be sure that no vehicle components or other vital parts could be damaged by the drilling process. Check both sides of the mounting surface before drilling begins. Also deburr any holes and remove any metal shards or remnants. Install grommets into all wire passage holes.

Use only soap and water to clean the outer lens. Use of other chemicals could result in premature lens cracking and discoloration. Lenses in this condition have significantly reduced effectiveness. Inspect and operate this product regularly to confirm its proper operation and mounting condition. **Do not use a pressure washer to clean this product.**
